Pankaj Rohila

- **Address:** India, Bangalore ● **Phone number:** +91-9739665283
- **Email address:** pankaj.rohilla893@gmail.com

PROFILE

Results-driven iOS Developer with **9+ years of experience** building robust, high-performance applications in the **finance and health care domain**. Passionate about innovation, continuous learning, and taking full ownership of products end-to-end — from analysis and design to deployment and support. Highly skilled in **Swift, Flutter, Xcode, and iOS**, with growing experience in **Python**, and a strong focus on delivering impactful, business-driven solutions.

EDUCATION

06/2011 – 05/2015
StaffordShire University, England

EEE | Bachelor of Engineering
Asia Pacific Institute Of Information & Technology
Staffordshire University – Marks 82%, Division I

WORK EXPERIENCE

05/2016 – 12/2018
Bangalore, India

IOS Developer
Thomson Reuters
- Developed and supported enterprise-grade trading mobile applications.
- Built high-quality, testable iOS components using **Swift** with an emphasis on long-term scalability.
- Increased app stability by systematically diagnosing production issues and optimizing critical code paths.

01/2019 – 01/2020
Remote, Australia

iOS Developer
Health Care Innovate (Clinivid)
- Led complete development lifecycle and resolved critical production issues
- improved app stability by **reducing crash rate by ~30%** through memory optimization and systematic crash analysis.
- Collaborated with cross-functional teams to deliver user-friendly solutions.
- Enhanced user experience, contributing to a **25–35% increase in user engagement**.

01/2020 – 02/2025
Remote, Australia

Lead IOS Developer
InfoMedix (Clinivid)
- Owned end-to-end iOS architecture and delivery for applications.
- Mentored developers, delegated components, and enforced coding standards and architectural best practices.
- Accelerated release cycles by **20%** through improved task prioritization and streamlined development workflows.
- Successfully delivered **5+ releases** with zero critical post-release issues.

04/2021 – 08/2025
Remote, Australia

Lead IOS Developer
KeyTrust
- Acted as the technical bridge between stakeholders and engineering, ensuring timely, high-quality delivery.

WORK EXPERIENCE

- Mentored **4–6 junior iOS developers**, improving code quality and reducing review rework by **~30%.**
- Continuous improvement, resulting in measurable gains in performance, usability, and App Store visibility.
- Improved test coverage to **70%+**, resulting in fewer production defects.

SKILLS

- **Languages:** Swift, Flutter, Dart, Python (scripting and automation)
- **Frameworks**: UIKit, Core Data, Multithreading(GCD), Flutter-SDK**,** XCTest, XCUITest, Providers
- **Software Architecture:** MVC, MVVM, Clean Architecture, Modular App Architecture, SOLID Principles
- **Mobile Engineering & Tooling:** Xcode, Instruments, TestFlight, CocoaPods, Swift Package Manager, CI/CD, Firebase Analytics, profiling.

PROJECTS

05/2016 – 12/2018
Bangalore, India

IOS Developer
NEST MOBILE

Technologies: Xcode, Swift, XC-Test, Mobile APP Development

- Developed and enhanced **Nest Mobile App**, a comprehensive iOS trading solution supporting members across multiple exchange venues.
- Implemented features for **real-time market data, order execution, and risk management** with a strong focus on performance and reliability.
- Optimized application performance and stability to support **high-volume trading activities.**

01/2019 – 02/2025
Remote, Australia

Lead IOS Developer
Clinivid

Technologies: Xcode, UI-Kit Swift, XC-Test, Python, VS-Code

- Developed **Clinivid iOS application**, enabling clinicians to improve healthcare communication using digital and video technologies.
- Built **intuitive iOS interfaces** in Swift for seamless video and messaging, using **Xcode, UIKit/SwiftUI, Core Data, and REST APIs**.
- Automated patient data extraction from **EMR systems** using **Python scripts**, streamlining workflows.

01/2020 – 08/2025
Remote, Australia

Lead IOS Developer
Family Share

Technologies: Xcode, Android Studio, Flutter, Dart, VS-Code

- Developed **Family-Share Flutter app** to enhance quality of life for elderly users with cognitive challenges.
- Created **intuitive, accessible UI** with Flutter, ensuring engagement across all cognitive levels.
- Used **Dart, Flutter DevTools, Firebase**, and state management frameworks (**Provider**) to deliver a scalable and maintainable solution.

ACHIEVEMENTS

- Reduced app crash rate by **40%** through performance profiling, memory optimization, and crash analytics.
- Successfully **designed, developed, and released an iOS application from scratch within a record 3 months**, meeting all quality and delivery milestones.
